

# AJAY PAL

Full Stack Developer | Python · Django · FastAPI · React.js · Next.js · Node.js

Airoli, Navi Mumbai, India · +91 7208401709 · ajaypal05192@gmail.com

Portfolio · GitHub · LinkedIn

## SUMMARY

Strategic and results-focused Full Stack Developer with 5+ years of success in architecting and deploying high-performance enterprise solutions. Specializing in the Python/Django/FastAPI backend and modern React.js/Next.js frontend, I have a proven track record leading large-scale projects across Supply Chain, Finance, and Enterprise Operations. Key achievements include reducing system latency by 35–40% and optimizing frontend load times by 40%.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript (ES6+), HTML5, CSS3

**Frontend:** React.js, Next.js, React Native, Redux, Tailwind CSS

**Backend:** Django, FastAPI, Node.js

**Databases:** PostgreSQL, MySQL, MongoDB

**APIs:** REST APIs, WebSockets, Firebase, Payment Integration

**Cloud & DevOps:** AWS (EC2, S3), Docker, Git, CI/CD

**Architecture:** Microservices, MVC

**Visualization:** Chart.js, Highcharts

**Tools:** Webpack, npm, Tauri

## EXPERIENCE

### Assistant Manager – Backend Developer

Radhakrishna Foodland Pvt. Ltd. | Feb 2026 – Present

Leading backend architecture and development for large-scale enterprise systems across warehouse, transport, attendance, and order management.

- Architected and delivered the **Attendance Management System (AMS)** supporting multi-location employee check-ins, shift scheduling, leave workflows, and compliance reporting
- Designed and built **scalable REST APIs** using Django and FastAPI, powering WMS, TMS, and OMS modules used by cross-functional operations teams
- Engineered inventory tracking, order lifecycle, and transport coordination modules, consolidating previously siloed workflows into a unified platform
- Optimized database queries and backend processes, significantly reducing response times and improving throughput under peak operational load
- Implemented **real-time log processing** for attendance and operational data, enabling live dashboards for management visibility

**Key Systems:** WMS (Warehouse Management) · AMS (Attendance Management) · TMS (Transport Management) · OMS (Order Management)

### Software Developer – Full Stack

Artdex & Cognoscis Technologies LLP | Oct 2021 – Feb 2026

Built and scaled SaaS products from the ground up across finance, HRMS, analytics, and inventory domains, progressing from feature development to full application architecture ownership.

- Architected and scaled full-stack SaaS products across finance, HRMS, and analytics domains using **Django, FastAPI, and React.js**, supporting thousands of daily active users.
- Optimized frontend responsiveness and reduced load times by **40%** through advanced code splitting, lazy loading, and state management strategies.
- Engineered a reusable UI component library that accelerated feature development by **30%** and significantly minimized regression bugs across multiple product lines.

- Streamlined enterprise reporting by delivering data-intensive dashboards with real-time analytics, reducing manual reporting effort by **60%**.
- Deployed and maintained high-availability containerized applications on **AWS EC2** utilizing Docker and automated CI/CD pipelines.

## PROJECTS

---

### Finycs – Cloud Accounting Platform

**Tech Stack:** Django · React.js · Redux · PostgreSQL · Tailwind CSS · Chart.js

- Engineered a full-stack accounting system with **complete GST compliance**, automated invoicing, and integrated payment gateway
- Built interactive financial dashboards covering cash flow, expenses, revenue trends, and tax summaries
- Achieved **~40% performance improvement** through frontend optimization and efficient API design
- Designed a multi-tenant data architecture to support concurrent clients with data isolation

### Foundation AI – Customizable Analytics Dashboard

**Tech Stack:** Django · React.js · Tailwind CSS · React Grid Layout

- Built a fully customizable **drag-and-drop dashboard engine**, allowing users to personalize their analytics workspace
- Refactored UI architecture to improve scalability, reducing component coupling and improving test coverage
- Delivered modular, reusable visualization components adopted across multiple product lines

### Inventory Management & Desktop Bridge App

**Tech Stack:** Django · React.js · Tauri (Rust) · REST APIs

- Developed a cross-platform desktop application with **real-time backend data synchronization**
- Reduced data sync latency by **~35%** through optimized API calls and efficient state reconciliation
- Bridged web-based React frontend with native desktop capabilities using Tauri (Rust), enabling offline-capable workflows

### Get It Done – HRMS & Task Management System

**Tech Stack:** Django · React.js · Firebase · Chart.js

- Built end-to-end task tracking and employee performance management modules for mid-sized teams
- Implemented **real-time push notifications** via Firebase for task assignments, deadlines, and approvals
- Delivered productivity dashboards with performance trends, workload distribution, and reporting exports

## EDUCATION

---

### BSc in Information Technology

JVM Mehta Degree College, Navi Mumbai | 2017 – 2020

## CERTIFICATIONS

---

- Microsoft MTA: Introduction to Programming Using Python
- HackerRank – Frontend Developer (React)
- HackerRank – REST API & Database Management
- HackerRank – Django Framework
- HackerRank – JavaScript (Basic)

## ADDITIONAL

---

- Actively exploring **Machine Learning and Generative AI** integration into production web applications
- Passionate about **clean architecture, performance engineering, and building systems that scale**
- Domain experience spanning **Finance, Medical, HRMS, Supply Chain, and Enterprise Operations**
